BELKIN。 Self Help Guide

IMPORTANT!

Before you begin

- You will need:
- Belkin VoIP unit
- Power cable
- Network cable

Hardware check:

- Your computer is switched on
- The VoIP unit is switched on (power switch at rear)
- Network cable connected from computer to the VoIP unit

F1PG200ENau

Upgrade the firmware on your Belkin ATA

This process may take up to 1-2 minutes

- Step 1 Open the ATA Discovery Tool (located on CD provided with ATA)
- Step 2 The Discovery Tool should find the ATA, highlight the listing then click **Open**

Discovery / Results	
192.168.1.106, UDP, OG3503A_AK01	Open
	Pause
	Clear
UDP Scan Progress:	

- Step 3 The Login page should appear. Type in your current password (default password = admin) then click LOGIN
- Step 4 On the left hand side of the screen click Advanced Setup
- Step 5You will now be presented with more options in the menu on the left.
Click Utilities then choose Firmware Update
